

WHY BUY A SENTINEL BLOOD PRESSURE MONITOR?

BENEFITS

- **Small compact unit allows manoeuvrability.**
 - Can move where the patient goes.
 - Works on battery power.
- **Optional mounting brackets**
 - Keeps unit safe from knocks and drops.
 - Attaches to IV pole and other equipment.
- **Ease of use**
 - Simple touch interface.
 - Easy to wipe clean screen.
- **Saves time**
 - Free PC software that automatically creates anaesthetic charts.
- **Quiet operation**
- **NIBP monitoring**
 - For a complete size range of species from cats to large horses.
- **Allows a choice of measurement methods**
 - Oscillometric/ Indirect
 - Direct/ Invasive
- **Integration with VitalMonitor Software Suite by Vetronic Services**
 - Full wired and wireless capabilities to link to PC.
 - Can be added as a module to VitalStore MultiMonitor Software.
- **Ideal for research**
 - Records every measurement to a PC.
- **Cost effective, Modular Unit**
 - Only need to buy what is required. Saves buying an expensive unit with specifications you might not use.

SEE WHAT OUR CUSTOMERS THINK!

"The Sentinel Blood Pressure monitor is an excellent piece of equipment. Its touch screen interface is well laid out and easy to navigate around. We bought the Sentinel as an upgrade from our old blood pressure monitor and I find it provides much more accurate and reliable readings. One feature I find to be particularly useful is portability this makes it ideal for horse anaesthetics and allows us to monitor blood pressure over long periods of time accurately. The Sentinel is a product I feel I can trust when working with and would personally recommend it to anyone who needs an upgrade in their blood pressure monitoring equipment". **Martin Hume BVSC MRCVS - Charter Vets, Barnstaple.**

"This piece of monitoring equipment is brilliant as we can turn the Sentinel on, set it to record the blood pressure for every three minutes and it does exactly what it says on the box. It is simple to use and very quick to set up and comes in a compact unit saving us vital space within operating theatres". **Sam Meech BSc RVN - Rowe Veterinary Practice, Thornbury.**

SUMMARY

The Sentinel Blood Pressure Monitor is a new concept in blood pressure monitoring. It has been designed as a small compact unit for saving space. Sentinel's modular system offers a cost effective way of addressing varied blood pressure needs for a range of species from small to large. Sentinel is designed to save any practice money by purchasing a single unit rather than multiple units for various blood pressure measurements. Sentinel is also compatible with our other wireless products via the VitalMonitor/ VitalStore software suite allowing storage and viewing of data past and present at the touch of a button. Here at Vetronic Services we also supply a range of consumables for your blood pressure monitoring needs (see our website for further details).
